

Add this function to your recipe.
And select a directory to save a file.

Then click “Export WS” or
“Draw” button.
Your file will be created on
the directory you selected.

Note: Every time you click “Draw” or “Export WS” button,
a file will be created or overwritten until you delete or disable this function.

Example of exported file: Continuous

Time point

	A	B	C	...
1	-0.04109	0.039619	-0.05423	
2	-0.00382	0.080966	-0.00916	
3	0.015251	0.018875	0.019656
